

## Ambience Odour Treatment

### What is it?

A fermented liquid formulation to suppress odours in animal and industrial spaces.

- Removes odours from stables, chicken coops, piggeries, dairies, and from anywhere animals are housed
- Removes odours from mice and rat infestations
- Reduces mould in animal enclosures

### Ingredients

- Structured water using MEA Water<sup>®</sup> Devices ([www.meawater.com](http://www.meawater.com))
- Beneficial cultures
- Fermented herb extracts
- Colloidal silver
- Proprietary Essential Oil Blend

### How to use

Spray **Ambience Odour Treatment** into the air above the area you wish to clean and allow a fine spray to settle on the surface.

### Storage & handling

Store **Ambience Odour Treatment** at room temperature and out of direct sunlight. Use within 18-24 months after opening.

Phi'on products are designed to address the fundamental link between healthy soils, plants, water, animals and humans.

## Microbial balancing

**Ambience Odour Treatment** works on the principle of microbial balancing. In nature, all surfaces from the air, ground and underground are populated by three types of microbes: **Beneficial** (that help balance intestinal flora, boost immunity and fight disease); **Pathogenic** (that are involved in decay and the root cause of disease) and **Neutrals** (that collaborate with both beneficial and pathogenic microbes and on their own have neither a positive nor negative effect.)

All these microbes compete for space. A natural environment has all three groups in harmony, but when these populations are out of balance, any surface can become potentially infectious, or noxious with foul odours. It can become harmful when **pathogenic** microbes are dominating the environment. These situations can be corrected within minutes after applying **Ambience Odour Treatment**.

Colloidal silver is a powerful and natural antibacterial agent. It has been shown to significantly reduce pathogens by disabling their oxygen metabolism enzyme.

## How do other products compare?

Other commercial odour or air-conditioning products can be used in conjunction with **Ambience Odour Treatment**, however, this product is best used as a finishing product to restore microbial balance.

## Why quality water matters

**Ambience Odour Treatment** is made using MEA Water® Devices patented technology that restructures and revitalises urban water by entraining a permanent negative charge to replicate the state of water in nature. This unique natural environmental approach results in enhanced activation of beneficial microbes leading to healthy domestic and industrial spaces.
